

Hotel Isolation/Quarantine Unit

Fire Safety Protocol Example

Logistics:

Total Rooms: 116

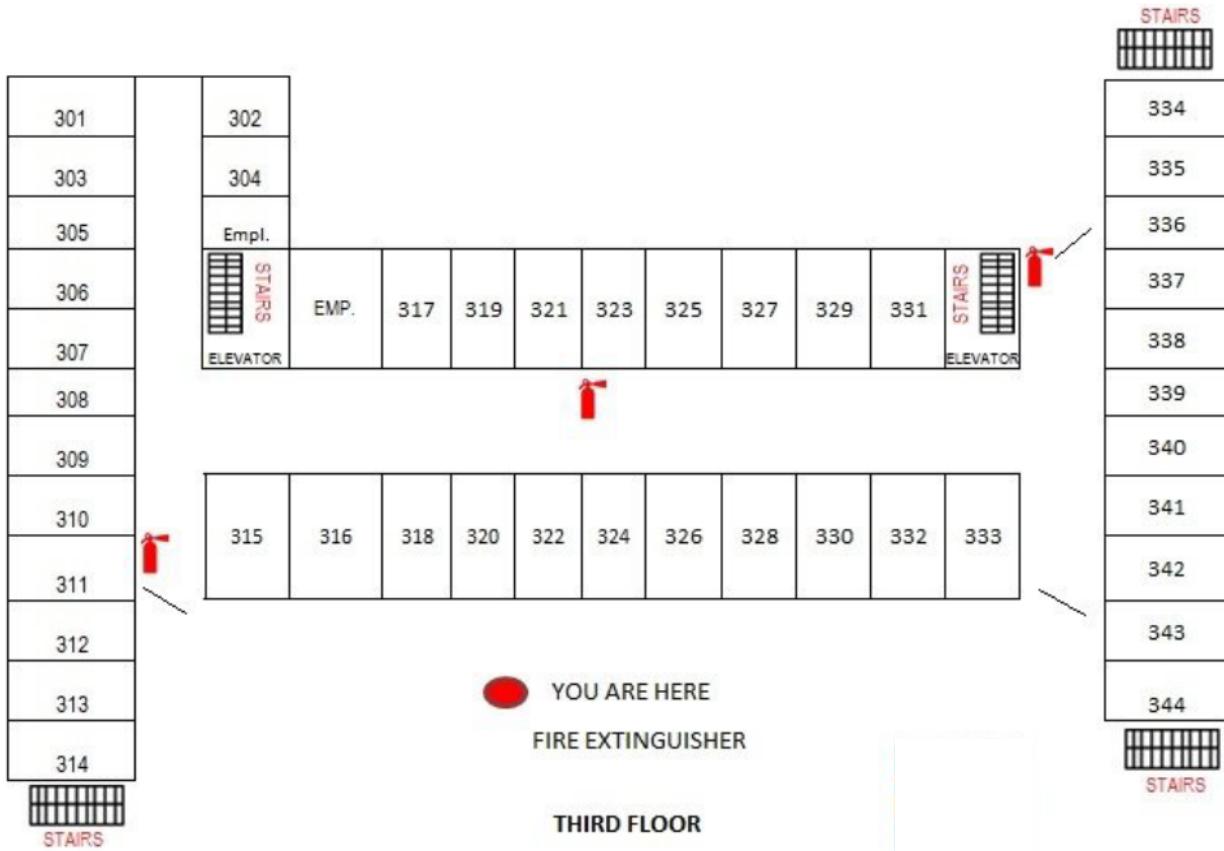

1st Floor: 29 Beds

2nd Floor: 44 Beds

3rd Floor: 43 Beds

Internal Map Layout:

PROPERTY LAYOUT

Total Fire alarms:

1st Floor: Total: 7

Locations:

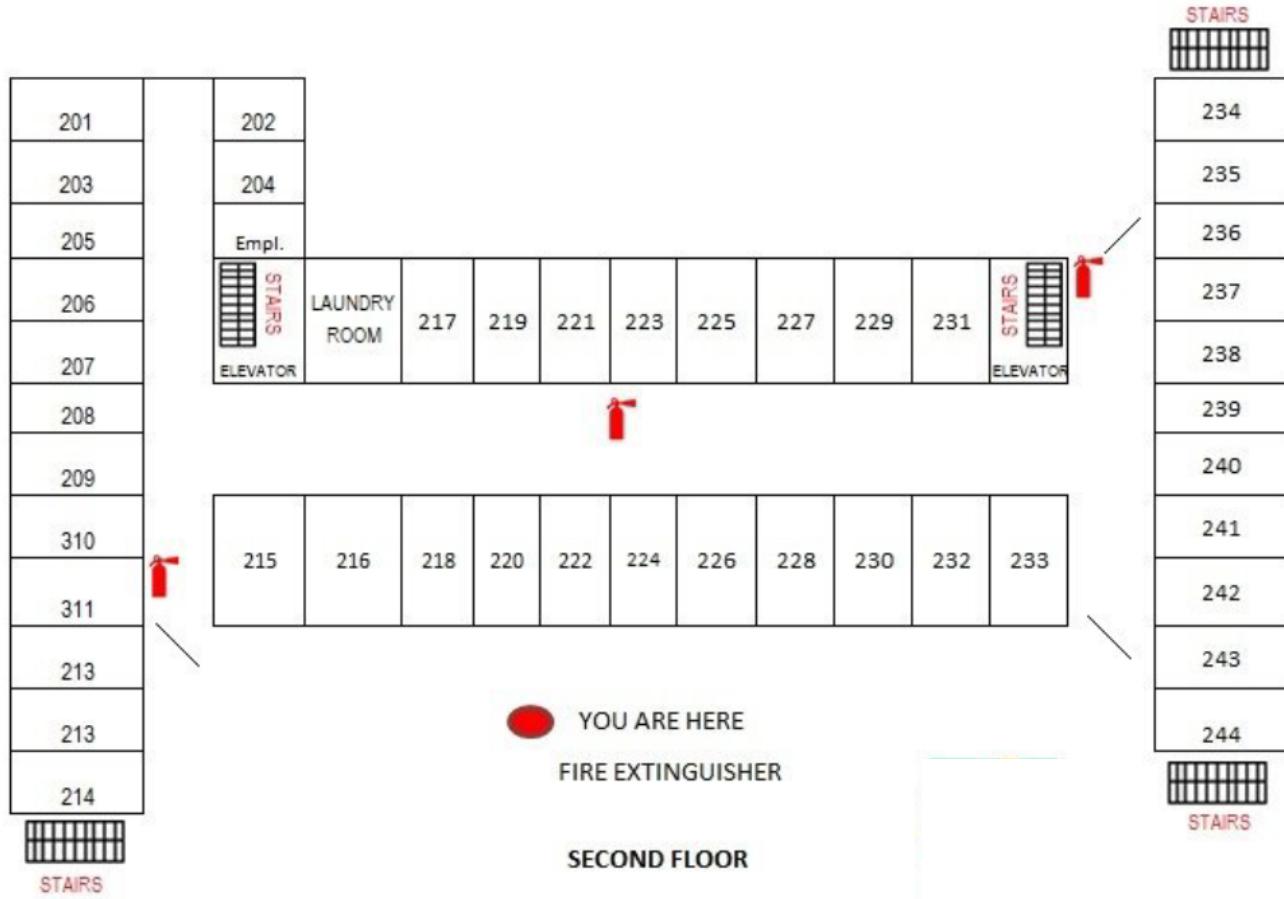

1. Wall next to room 122
2. Next to laundry room
3. Behind security room
4. Exit Door in front of room 101
5. Exit Door towards the balcony to West side
6. Lobby in the Reception area
7. Next to the fire control panel.

Total Fire Extinguisher:

1st Floor: Total: 5

1. Wall towards the balcony to West side.
2. Middle of the Hallway
3. Exit Door towards the balcony to East side
4. Inside the laundry room.
5. Front lobby in the reception area.

PROPERTY LAYOUT

Total Fire alarms:

2nd Floor: Total: 5

Locations:

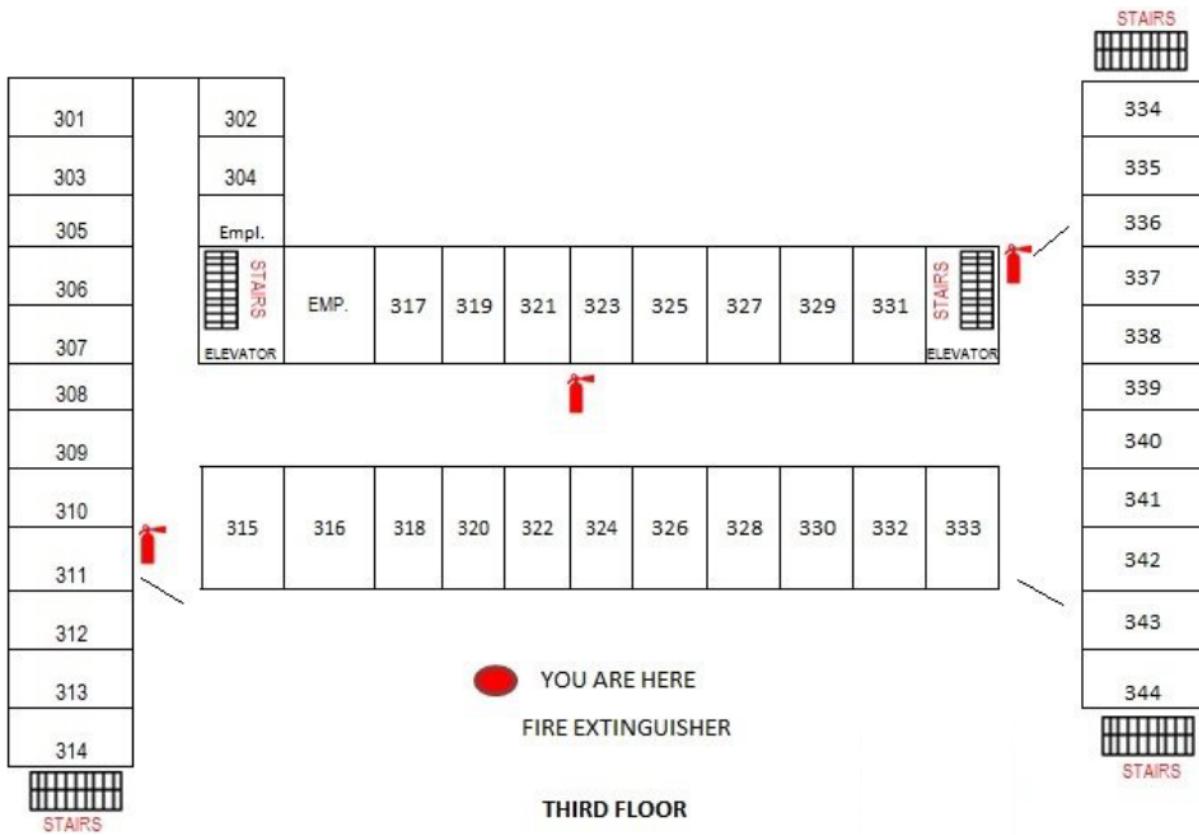

1. Wall towards the balcony to West side.
2. Next to stair North side
3. Exit Door towards the balcony to East side
4. In front of room 205
5. Next to the elevator North side.

Total Fire Extinguisher: 4

Locations:

1. Exit to the Balcony North side
2. Middle of the Hallway
3. Exit Door towards the balcony to West side
4. In front of room 205

PROPERTY LAYOUT

Fire alarms: Total 5

3rd Floor:

Locations:

1. Exit to the balcony North side
2. Exit Door towards the balcony to West side
3. Exit Door towards the balcony to East side
4. In front of room 305
5. Next to the elevator North side.

Fire Extinguisher: 4

3rd Floor:

Locations:

1. Exit to the Balcony North side
2. Middle of the Hallway
3. Exit Door towards the balcony to West side
4. In front of room 305

Fire Safety Protocols

Fires in workplace have catastrophic consequences. For the protection of everyone, it should be a priority to learn the location(s) of the following emergency features in every facility they work:

In case of a fire, please remember the following acronym for what steps to take:

R··· **RESCUE** anyone in immediate danger.

A··· **ALARM** activation of fire alarm and notify the operator.

C··· **CONTAIN** the fire by closing doors and windows.

E··· **EXTINGUISH** fire, if possible and evacuate, if necessary.

If you are able to extinguish a smaller fire, without placing yourself or others in danger, please remember the following acronym in proper fire extinguisher usage:

P··· **PULL** the pin.

A··· **AIM** the nozzle at the base of the fire.

S··· **SQUEEZE** the handle.

S··· **SWEEP** nozzle, side to side at the base of the fire.

Fire Extinguisher Classes

There are five different kinds of extinguishers: Classes A, B, C, D and K.

Class A works on dry fuels,

Class B is for flammable liquids and

Class C is designed for electrical fires.

Class D extinguishers, geared to flammable metals, are found in labs and

industrial settings.

Class K extinguishers are for large grease and oil fires, usually in commercial or institutional kitchens.

An extinguisher labeled for **Class B** or **Class K** is suitable for grease or oil fires.

Fire Safety Protocols

Fire Facts:

- Electrical fires are the second greatest common cause of workplace fires. Grounding (the third prong on an electrical plug) is most important in electrical safety
- Please note the following conditions which could indicate a hazardous situation and report them immediately to your supervisor:
 1. Broken, bent, or loosed two-or three-prong plugs.
 2. Worn, frayed, or burned power/extension cords.
 3. “Burning “smell or any smoke from electrical equipment
 4. Over-heating of electrical equipment
 5. Malfunctioning or non-functioning alarms
 6. Liquid spills onto electrical equipment

If evacuation is needed:

1. Call 911 if obvious fire is seen and noted
2. Evacuate horizontally first. Move patients to the other side of closed fire doors, then...
3. Vertical evacuation (floor from floor) is next, then...
4. Building evacuation. **Never use elevators** during a fire. Stairwells offer the best route in vertical evacuation
5. Keep parking lot clear for paramedics and firefighters
6. Charge nurse will take charge and be the lead. for the situation
7. All medical staff teams will gather the list and statistics to start segregating patient into three faction at the back of the parking lot – East Side:
 - Covid-19 Positive (+)
 - Covid-19 Pending/Unknown
 - Covid-19 Negative (-)
8. Gather ample PPE and needed supplies to take care of patients appropriately
9. Clinical Support Teams will gather ample supplies, food, water, and necessities for patients
10. Security Team will coordinate with charge nurse for logistics and traffic control
